

Kingfisher 1200 Powercat

1200 Powercat

Versatile, Powerful.
Long Range Cruising
Inboards or Outboards

A 12.0m Fully Customable Catamaran

Long Range – Leisure - Touring

PDL Marine are proud to present the Kingfisher 1200 Powercat. The Kingfisher 1200 is a new design by Roger Hill and features a displacement hull with remarkable speed, extremely economical fuel usage and an exceptional smooth ride, what more could you want!

Power options for this vessel vary from outboards starting at twin 90hp outboards up to twin 270hp inboards giving a long distant range of up to 1000 miles.

As a larger build, the options are endless. Cabin layout, open deck, teak decking. The lower deck accommodation has two aft cabins with a larger single berth and twin forward cabins with either a double berth in each or two singles. As a standard model on the main deck there is a cockpit head, galley, Settee with dining table and a centre line helm station.

The hull shape generates additional lift especially in the aft section assisting with the hydro dynamics and promoting fuel efficiency and giving a top speed in the late 20's
